Tired of searching for first-launch opportunities with expiry information that's incomplete, inaccurate and hard to use?

Introducing Pipeline Scope. Accurate and simple-to-use expiry information like you've never experienced.

GenericsWeb has relied on extensive experience and industry focus to build a database that sets new standards in high-level patent and data exclusivity information, allowing you to identify unique opportunities and maximise the value of your portfolio across global markets.

WHAT IS PIPELINE SCOPE?

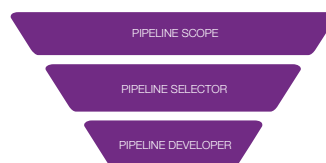

Pipeline Scope is an online intelligence tool containing key patent, SPC and data protection expiry information.

- Provides accurate and complete intelligence for over 1400 INNs.
- Includes key patent publications for over 40 countries.
- Contains comprehensive SPC data for all EU member states, plus patent extensions for non-EU countries.
- Data exclusivity calculated on a country by country basis.
- Searches by name, number, expiry date, therapeutic or biologic category.
- Incorporates changes to legislation (e.g. EU pediatric extensions).
- Enables fast analysis and verification by hyper-linking to crucial patent documents and national registries.
- Updated on a monthly basis, including changes to patent families, litigation, statuses, patent and extension expiry dates.
- Based on rigorous analysis and testing of data for ultimate reliability.
- Provided on a subscription basis via web-based access to a search interface.
- Available in two subscription levels, offering country coverage to suit any company or user.
