

# PIPELINE SELECTOR

MAKE FASTER,  
SMARTER PIPELINE  
SELECTION DECISIONS

Single-drug access to essential competitor, regulatory and patent expiry information for quick and easy selection of your generics pipeline.

# Analyse the landscape for a generic candidate within minutes, instead of hours.

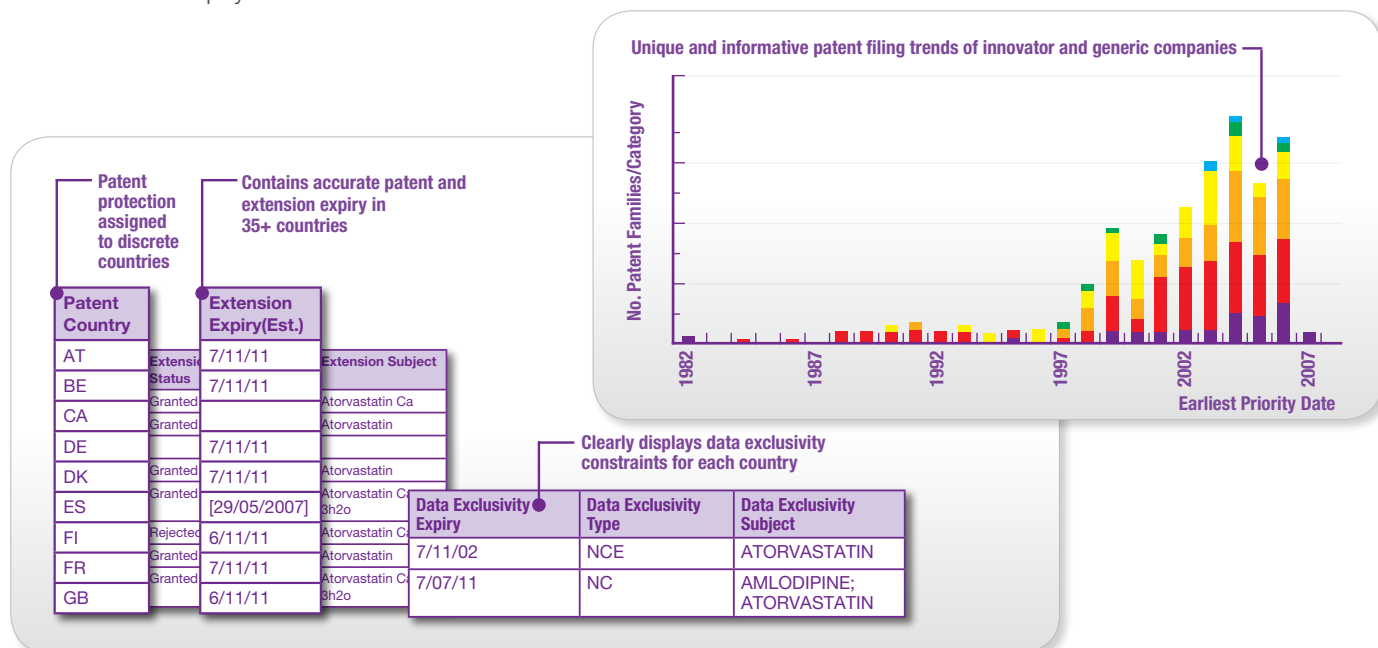

Pipeline Selector helps you avoid hours of painstaking research by quickly providing you with an accurate snapshot of a single INN, including key patents, extensions and data exclusivity expiry for over 40 countries, regulatory issues and key players.

With Pipeline Selector there is no need to subscribe to an entire database – get only the information you need on the products you need in seconds.

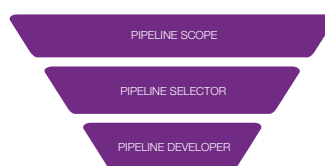

## WHAT IS PIPELINE SELECTOR?

Pipeline Selector is an online intelligence tool provided on a per drug basis:

- Includes key patent publications for over 40 countries.
- Contains comprehensive SPC data for all EU member states, plus patent extensions for non-EU countries.
- Data exclusivity calculated on a country by country basis.
- Summary of dosage forms, strengths, indications and active ingredient forms of the brand product.
- DMF & Paragraph IV filings.
- Marketing authorisation holders in selected territories.
- Incorporates changes to legislation (e.g. EU pediatric extensions)
- Patent risk analysis via graphical display of data from patent filings.
- Hyper-linking to crucial patent documents and national registries enabling data verification.
- Available in two subscription levels, offering country coverage to suit any company or user
- Updated on a monthly basis, including changes to patent families, litigation, statuses, patent and extension expiry dates.

Pipeline Selector is just one of the benchmark products from GenericsWeb's Pipeline Patent Intelligence product suite.
